WOMEN: THE HARBINGERS OF CHANGE

GOA MARRIOTT RESORT AND SPA

Women: The Harbingers of Change

Women will lead the new world order. As more women join the workforce, as more women undertake leadership roles, as more women lead political fronts, as more women enter education, as more women connect with more women, as more women feel empowered to communicate and express, as ALL that happens, the world is bound to change.

To understand the undercurrents of change through a cross-sectional perspective, ALL WEF has brought four strands of thought to focus on, in order to help women better focus on all that they do and strategize more consciously on future objectives and areas of growth.

These four strands will help us vibrantly explore ourselves inside-out. By sorting ourselves from within, helped by the sessions on "Work, Life, & Worldview"; by understanding our various challenges from sessions on "Security & Vulnerability"; and by understanding the dynamism in our daily worlds driven by "Technology, Innovation & Communication" as also "Entrepreneurship & Growth," we will gain valuable perspectives on how to realign ourselves to our purpose within and to our missions ahead with far more immediacy and innovation, and far greater consciousness and creativity.

Work, Well-Being & World View

Achieving work-life balance is amongst the foremost challenges for women professionals and entrepreneurs globally. Since women like to succeed equally in their personal lives and look after their loved ones be their spouses, parents, children, friends or elders, sessions will explore various facets of the challenges faced by women across countries and successful strategies evolved to overcome them. In order to encourage larger number of women to proactively lead and fearlessly engage, it is equally important to develop a larger social consciousness vis-à-vis the changing needs and necessities of women who find their energies scattered and stretched thin as they perform multiple roles at work and at home. How can we foster an ecosystem that helps women value their professional lives without being conflicted about issues at home? Perhaps easing off the social, mental and emotional pressures on the women will help them grow financially and scale the echelons of power and be ever more present in the C-suite.

Security & Vulnerability

A family is as powerful as its women are. Same is true for a society, for a country and for a global order: they can only be half as powerful as they could be if half of their population of women continues to remain vulnerable, scared, hungry, sick, illiterate, oppressed and exploited. While we all agree that we need to create a healthier and safer environment for women to grow and prosper, there are troubled news' of rapes, abductions, trafficking from all four corners of the world. The global community needs to come together in addressing this grave imbalance and injustice that threatens the very force of sustenance and love in our world – the woman.

Technology, Innovation & Communication

New technologies are empowering our lives and making them 'smarter.' How can we maximize their potential for making smarter choices in individual businesses and also for resolving some of the world's intractable problems like lack of education and healthcare? Technology is also giving us access to big data and cross-sectional analytics that can open up new dimensions for expanding business and strengthening impact of social leadership. Sessions will discuss some of the most worthy innovations that are shaping our world today and immense great

promise to change the future for millions through the digital revolutions that are changing the way we live, communicate, educate, learn and connect.

Entrepreneurship & Growth

Emerging world economies are looking for more growth and development; and the only way to allow each and every human to fully participate in shaping up the world economy is via promoting entrepreneurship. Rising start-ups & entrepreneurship will not just help with creating a new generation of job-creators but will also rev up the sluggishness afflicting economies around the world. How framing friendly policies for business and start-ups can foster not just greater growth in countries but also simultaneously empower women and youth in lasting and sustainable ways.

Focus Country : India

Engaging with India: Challenges and Opportunities

We all recognise India as the fastest growing economy in the world and one that can lift the developed economies out of their current recession. Everyone wants to come to India and participate in its growth.

Yet the mind-boggling diversity and lack of predictability is a challenge as much as its an opportunity. While India has the world's largest poor population yet it also has a 350 million middle class, with huge buying power, larger than the United States. India has three times the number of mobile phones and 15 times the number of smart phones in our country compared to the US. It has just about every car manufacturer present here making automobiles for India and the world. India is also the largest growing market for luxury goods.

And of course, the beautiful and ancient Indian civilisation has much more to offer spiritually. People from all over come to India to imbibe its way of living: having humility, hospitality, faith, resilience, selfless service, courage in face of adversity and the ability to smile and give happiness even when one is poor and bleeding inside. That's India strength and India will lead in not just as an economic power but in its ability to raise the world out of its current depressive and the I-me-mine attitude.
